About this guide.....X
What is included in this guide?XI

Chapter 1
Know your rules and responsibilities 001

The structure of the aviation legislation 002

Tier 1 – Civil Aviation Act and Airspace Act 003
Tier 2 – CAR and CASR 003
Tier 3 – MOS, CAO and other instruments 003
Aeronautical Information Publication (AIP) 004
Supporting material 005

Fit to fly 007

Drugs and alcohol 007
Alcohol and flying do not mix 007
Psychoactive substances 008
Fatigue and its effects 009

Licensing 011

Flight crew licence and medical requirements 011
Pilot licence 012
Student pilot 013
Recreational pilot licence 015
Private pilot licence 016
Documents to be carried..... 020
Community service flight (CSF) 022

Pilot responsibilities 024

Aircraft not to be operated in manner that creates a hazard..... 024
Crew members to be fit for duty 024
Authority and responsibilities of pilot in command 025

Compliance with flight manual 025
Actions and directions by the operator or pilot in command 026
Manipulating flight controls 026
Offensive and disorderly behaviour ... 027
Training flight limitations 027

Seating and carriage of persons, cargo, animals and firearms..... 028

Seating for flight crew members 028
Seating for persons on aircraft 028
Carriage of cargo – general 030
Carriage of animals 032
Firearms 033

Smoking 034

Fuelling..... 035

Oil requirements 035
Contaminated, degraded or inappropriate fuels 035
Fuelling aircraft – firefighting equipment 038
Fuelling aircraft – electrical bonding ... 038
Equipment or electronic devices operating near aircraft 038

Fuelling turbine-engine aircraft – low-risk electronic devices 039
Hot fuelling 040

Fuelling aircraft – persons on aircraft, boarding or disembarking 040

Ground operations..... 041

Parked aircraft not to create hazard ... 041
Taxiing aircraft 042
Safety when rotorcraft operating on ground 042
Anti-collision lights – display 043

In flight..... 044

Minimum height rules – populous areas and public gatherings 044
Minimum height rules – other areas ... 047

Low flying	049
Formation flying	051
Aircraft speeds	052
Pilot in command to report hazards to air navigation	053
Navigation logs	053

Rules for prevention of collision 054

Basic rule	054
Right-of-way rules	054
Additional right-of-way rules	055
Right-of-way rules for take-off and landing	057
Compliance with international regulations	057
Giving way to vessels	057
Giving way on water	057

Pilot maintenance 058

What maintenance are you permitted to carry out?	058
What you need to have when performing maintenance	058
Daily inspection	059
Further information	059

Aircraft equipment..... 060

Operating aircraft with inoperative, equipment – placarding	060
Day VFR equipment.....	060
Night VFR equipment	062

Aerodromes 064

Light and ground signals	064
Aerodrome markings	065
Displaced threshold	069

Accidents and incidents 071

Reporting to the ATSB	071
Mandatory reporting – immediately reportable matters	071
Mandatory reporting – routinely reportable matters	072

Voluntary reporting – aviation confidential reporting scheme (REPCON).....	074
--	-----

Chapter 2

Planning your flight 075

Pre-flight preparation 076

Pre-flight information	076
Forecasts for flight planning	077
Alternate aerodrome due to weather ..	079
Alternate minima – Australian aerodromes	082
Destination alternate aerodromes – navigation	082
Destination alternate aerodromes – restrictions	083
Radio communication system requirements	083
Take-off and landing requirement – use of aerodromes	084
Military aerodromes used by Australian and foreign aircraft.....	085
Performance considerations	086
Icing.....	095
Fuel requirements	098
Time	110
Daylight and darkness	112
Charts	117
Restricted and danger areas	120
Meteorology 122	
Services	122
Forecasts and reports	123
Graphical area forecasts (GAF).....	128
Grid point wind and temperature (GPWT) forecasts	132
Aerodrome forecasts and reports	134
Authorised weather forecasts and reports	146
Meteorological reports and advice	146

Introduction

Time that search action is required (SARTIME).....	153
Flights over water	155
Designated remote areas.....	158
Emergency locator transmitter (ELT) ...	161
Pre-flight briefing and flight notification	163
Flight information service.....	191

Chapter 3

Flying your aircraft 201

Visual flight rules 202

VFR flight navigation requirements	202
Determination of visibility for VFR	203

Inspections and briefings 209

Matters to be checked before take-off	209
Fuel system inspection.....	211
Passengers – safety briefings and instructions	212

Altimetry..... 214

Checking systems for measuring and displaying pressure altitude – general	214
Checking pressure altitude systems – visual flight rules (VFR) flight	215
Accurate QNH and site elevation	215
Specified VFR cruising levels	216
Transition altitude, transition layer and transition level	217

Airspace classification 220

Air traffic services provided by airspace and class of operation	224
Prohibited, restricted and danger areas.....	225
Lanes of entry.....	230
Broadcast areas.....	230
Common traffic advisory frequency (CTAF).....	231
Air defence identification zone	231

Air traffic services (ATS) surveillance services 232

Carriage of transponder equipment ...	232
Operation of transponder equipment – general requirements	232
Transponder emergency codes	235
Radio communications procedures	236
Identification procedures	236
Vectoring procedures	236
Search and rescue – SARWATCH and SARTIME.....	237
Operational information.....	238

Non-controlled aerodromes..... 239

Meaning of ‘in the vicinity’ of a non-controlled aerodrome	240
Operating on manoeuvring area, or in the vicinity, of a non-controlled aerodrome – general requirements ...	240
Managing traffic at non-controlled aerodromes	241
Circuit procedures at non-controlled aerodromes	242
Arrivals, departures and transits	248
Traffic mix	253
Hazards	257
Surveillance information service	260

Class E airspace procedures 262

VFR flights in Class E airspace	262
---------------------------------------	-----

Controlled aerodromes and controlled airspace..... 263

Control zones and areas – entry into Class A, C or E airspace	263
Control zones and areas – entry into Class D airspace	263
Control zones and control areas – operating in Class A, C, D or E airspace	264
Clearances for entry into a controlled area.....	264
Engine start and taxi	269
Take-off	271

After take-off.....	273
Holding	277
Arrival	278
Visual approach	278
Landing	280
Class D operations	284
Class D airspace requirement.....	284
En route	288
Inbound (.....	289
Sport and recreational aviation	293
Gliding operations	293
Parachuting operations	295
Ballooning	296
Types of operation	296
Operations in controlled airspace and in the vicinity of non-controlled aerodromes	297
Carriage and use of radio.....	297
Minimum height rules	298
Meteorological conditions for balloons.....	298
Night VFR	299
Checklist.....	299
General flight operations.....	301
Rating and endorsements.....	302
Recent experience requirement.....	305
Aircraft equipment for night VFR.....	306
Lowest safe altitude.....	311
Alternate aerodromes.....	320
Destination alternate aerodromes – aerodrome lighting	321
Air defence identification zone (ADIZ).....	324
Air defence identification zone flights	324
Procedures for aircraft operating in an air defence identification zone	324

Chapter 4

Flying your helicopter 331

Requirements..... 332

General competency and recent experience.....	332
Equipment.....	333
Hot fuelling	336
Special VFR	337
Alternate landing sites	337

Procedures..... 338

Visual meteorological conditions.....	338
Aerodromes.....	341
Minimum height	346
Helicopter operations – radio phraseology.....	349
Over-water flights.....	349

Chapter 5

Radio communication procedures 351

General communication phrases... 352

English language	352
Phonetic alphabet	353
Numerals	353
Transmission of numbers	354
Altimetry phrases.....	356
Other standard words and phrases	356
Transmission readability.....	358
Aircraft callsigns	359

Non-controlled airspace and non-controlled aerodromes..... 360

Carrying a radio in non-controlled airspace	361
Frequency management.....	361
How to determine where radio carriage is required	362
Listening watch of radio transmissions	363

Introduction

The use of a handheld radio	363	Speed control	393
Flight with inoperative radio	363	Traffic information in a radar or surveillance environment	394
Pilot not radio-qualified or aircraft without radio	364	Traffic information	395
Radio failure en route in Class G or E airspace	364	Meteorological information	396
Radio broadcasts in CTAF	365	Reports and information	397
Standard broadcast format	367	Starting and initial clearance issues.....	399
VFR aircraft in Class E or G airspace – prescribed reports	367	Clearances.....	400
Mandatory broadcast area (MBA)	368	Taxi procedures	404
Surveillance flight information service (SFIS)	370	Aerodrome movements.....	407
Flight information Service and F lightwatch	370	Runway operations	408
Air-to-air communication between pilots.....	371	After take-off.....	410
Aerodrome frequency response unit (AFRU).....	371	Approach and area control services....	412
Certified air/ground radio service (CA/GRS).....	372	Arrival at aerodrome.....	413
UNICOM	374	ATS surveillance service phrasing.....	416
Controlled airspace and controlled aerodromes	375	Secondary surveillance radar (SSR) and ADS-B	420
ATS callsigns.....	375	SARTIME	422
Communication monitoring in controlled airspace	376	Emergency – distress and urgency	423
Control zones and areas – entry into Class A, C or E airspace	378	<hr/>	
Broadcasts and reports general	378	Chapter 6	
Prescribed reports in controlled airspace	379	Decision-making	
Read-back requirements	380	and hazards	425
Conditional clearances	381	<hr/>	
Route terminology	381	Pilot fitness	427
Amended route or level	381	Illness and medication	427
Limited radio or no radio in CTA	382	Stress.....	428
Radio failure in controlled airspace	382	Alcohol	428
Class D airspace.....	382	Fatigue and eating	428
Standard phrases.....	386	Pilot competence	429
General phrases	387	Maintaining your proficiency	429
Frequency management.....	390	Attitude.....	431
		Decision-making	432
		Improving your decision-making	435
		Hazards	436
		Loss of control	436
		VFR flight into IMC	437
		Mid-air collisions	437
		Further reading	438

Chapter 7

Dealing with
emergency situations 439

Planning 440

Helping search and rescue 441

Make your decisions early 443

Distress beacons 444

Carriage of emergency locator
transmitters (ELTs) 444

Types of beacons 447

**The COSPAS-SARSAT search and
rescue satellite system 448**

When should a distress beacon
be used? 449

Registration of beacons 451

Testing 452

Emergency activation 453

Emergency signals 455

Distress signal 455

Urgency signals 456

Forced landings 457

Initial action 457

Forced landing procedure 458

Emergency landing –
multi-engine aircraft 458

Hints for survival 459

Remote area survival 459

Sea survival 465

Radio communication failure 467

Procedures 467

Initial actions 469

Destination procedures 469

Communication and NAVAID failure 471

Chapter 8

Appendices 473

Abbreviations and acronyms 474**Definitions 486****Quick reference 517**

Are you safe to fly? 517

Aircraft specifications 518

Forced landing initial action 519

Forced landing procedure 520

Night VFR checklist 521

Light signals 523

Signals for the control of
aerodrome traffic 524

Windsock interpretation 525

Carburettor icing probability 525

Conversions 526

Index 529
